

# HIMO

Product Name: Lithium battery for electric bicycle

Type: ShanHu 36V10AH      Standard Voltage: 36V

Battery Capacity: 10AH      Charging voltage: 42V

Executive standard: QB / TB29473-2008

## Attention

1. It is strictly forbidden to place the battery in a high-temperature environment, such as heating, near a fire source or exposed to sunlight.
2. It is strictly prohibited to reverse the positive and negative poles of the battery, and it is strictly prohibited to damage, disassemble or short-circuit the battery.
3. It is strictly forbidden to put the battery in acidic, alkaline, salty liquid or water to avoid rain and water.
4. It is strictly prohibited to charge the battery below 0°, charge at 0-35°, discharge at -10°C-45°C, and keep the battery dry.
5. Avoid piercing, dropping, or squeezing the battery by sharp objects to prevent battery leakage, heat generation, smoke, fire or explosion.
6. It is strictly prohibited to charge indoors, corridors or confined small spaces.
7. Use the original lithium battery charger when charging, and the charging time should not exceed 8 hours.
8. When the battery is not used for a long time (more than a week), please disconnect the battery from the vehicle and ensure to charge it once every three months so that the battery can be stored in the best storage capacity.
